

Veröffentlichungen 2011/2012

S. BISCHOFF, L. GAUL: Study of Mode Conversion at Defects in Rope Structures using Ultrasonic Waves. GAMM-Jahrestagung, Darmstadt, CD-ROM, 2012.

S. BOGRAD, P. REUSS, A. SCHMIDT; L. GAUL, M. MAYER: Modeling the dynamics of mechanical joints. MSSP, 25 (8), S.2801-2826, 2011.

S. ENGELKE, L. GAUL, J.-U. POTT, M. KÜRSTER, J. TROWITZSCH, J. L. BORELLI: Process Noise Identification and Observer Design for the Large Binocular Telescope. System Identification: Applications, IMAC XXX, Jacksonville, Florida, USA, CD-ROM, 2012.

L. GAUL: Structural Damping in Bolted Joints – Simulation and Measurement.
2. VDI-Fachtagung “Schwingungsdämpfung”, VDI-Berichte 2164, VDI-Verlag Düsseldorf, S. 1-8, 2011.

L. GAUL, D. BRUNNER, M. JUNGE, J. HERRMANN: Calculation of vibro-acoustic response by fast BEM and FEM approaches. Proceedings of the 6th European Congress on Computational Methods in Applied Sciences and Engineering (ECCOMAS), Vienna, Austria, CD-ROM, 2012.

L. GAUL, J. HERRMANN: Numerical and Experimental Vibroacoustic Response of Cars and Ships. Symposium in Honour of Professor Lothar Gaul (ICCES Lifetime Award), International Conference on Computational & Experimental Engineering and Sciences (ICCES), Kreta, Griechenland, CD-ROM, 2012.

L. GAUL, A. SCHMIDT: Strukturdämpfung in mechanischen Fügestellen. MTZ, 73 (5), S. 430-434, 2012.

L. GAUL, H. SPRENGER, C. SCHAAL, S. BISCHOFF: Structural Health Monitoring of Cylindrical Structures using Guided Ultrasonic Waves. Acta Mechanica, 223, S. 1669-1680, 2012.

online available at: doi: 10.1007/s00707-012-0634-z

T. HAAG, M. HANSS: Comprehensive modeling of uncertain systems using fuzzy set theory. Nondeterministic Mechanics, CISM Courses and Lectures, 539, Eds: I. Elishakoff, C. Soize, Springer, 2013.

T. HAAG, S. CARVAJAL GONZÁLEZ, M. HANSS: Model validation and selection based on inverse fuzzy arithmetic. Mechanical Systems and Signal Processing, 32, S. 116-134, 2012.
online available at: doi:10.1016/j.ymssp.2011.09.028

J. HERRMANN, L. GAUL: Berücksichtigung der Fluiddämpfung bei der Modellierung und Simulation fluidbefüllter Leitungssysteme. 2. VDI-Fachtagung "Schwingungsdämpfung", VDI-Berichte 2164, VDI-Verlag Düsseldorf, S. 45-53, 2011.

U. MILLER, L. GAUL: The Rayleigh quotient iteration for quadratic eigenvalue problems. Proceedings in Applied Mathematics and Mechanics (PAMM), 11, S. 331-332, 2011.

P. REUSS, J. BECKER, L. GAUL: Efficient Damping Prediction of Bolted Structures Using the Harmonic Balance Method. ASME IDETC 2012 Chicago, Illinois, 24th Conference on Mechanical Vibration and Noise (VIB), VIB – 5-3 Jointed Structures, Contact and Friction II, CD-ROM, 2012.

C. SCHAAL, M. HANSS: Modeling wave propagation in coupled waveguides with uncertain parameters. Proceedings of ISMA-USD, S. 4945-4958, 2012.

H. SCHMIDT, S. BOGRAD, L. GAUL: Werkstoff- und Fügestellendämpfung II. Modellierung von Werkstoff- und Fügestellendämpfung in der FEM. Abschlussbericht FVV Frankfurt, Heft 940, 2011.
